PRESS RELEASE

SUSPENSION TO TAME ANY TERRAIN

After extensive research and development, major four wheel drive brand 'Terrain Tamer' has released its new Suspension Program to benefit all 4WD workshops and enthusiasts across the country. Boasting an owner's lifetime warranty on their new Australian made coil springs, Terrain Tamer have developed a product specially designed for the tough Australian 4WD environment.

Terrain Tamer's General Manager, Jim Dean explains how the product's quality is fully appreciated by the ever-demanding mining industry. "Most four wheel drive vehicles never get off-road so a suspension's quality is never really tested. However, when our mining customers have four wheel drives that live their entire lives underground then the highest quality Suspension is demanded. The more informed 4WD enthusiast also appreciates the quality of this product".

Australian made coil springs; a broad range of premium shock absorbers plus a branch in each major Australian city are key ingredients that allow Terrain Tamer to supply this premium product instantly. The simplicity of the process takes the hard work out of a suspension purchase. Terrain Tamer has experienced parts interpreters on location to work with each customer and ensure the correct decisions are made in what has traditionally been a complicated and exhausting task.

The Terrain Tamer Suspension range covers the majority of 4WD's driven in Australia and are available from Don Kyatt Spare Parts and select stockists that can be found at terraintamer.com.
