NEW TERRAIN TAMER 'SERIES 3' COMPRESSOR

4WD product range Terrain Tamer has just released a new Series 3 Air Compressor to compliment their range that includes the Series 1 and 2. The Series 1 is a basic emergency compressor that will get you out of trouble. The Series 2 is much more robust and designed to be a very dependable unit for the holiday Four Wheel Drive owner. Now the Series 3 will be for those four-wheel drivers who are constantly deflating and inflating their tyres depending on the terrain they are crossing.

“Sand driving has specific requirements and tyre pressures that need to be adjusted. With this in mind our customers were constantly enquiring when we would be releasing a ‘heavy duty’ product. It is obviously priced accordingly, compared to the smaller units but will now save precious time.” States General Manager Jim Dean.

The new TTAC3 boasts a large 120 Max working pressure, 26 foot coil hose and a Heavy Duty 8 foot power cord.

In response to their customer’s needs, Terrain Tamer has grown its range in recent times that meet with their proven Australian Outback quality. The Terrain Tamer range covers Recovery Gear, Suspension and a vast quantity of Four Wheel Drive hard parts.
